

# Accelerated Reconstruction

Noam Korngut, Nitzan Avidan  
Spring 2021

**TECHNION**  
Israel Institute of Technology

# KIKI-net

- ▶ Purpose:
- ▶ To demonstrate accurate MR image reconstruction from undersampled k-space data using **cross-domain** convolutional neural networks (CNNs).
- ▶ The network architecture operating on k-space, image, k-space, and image sequentially

# KIKI-net

► Cross-domain CNNs consist of 3 components:

1. KCNN - a deep CNN operating on the k-space (as Raki)
2. ICNN - a deep CNN operating on an image domain (as Unet)
3. IDC - Interleaved data consistency operations

# Problem Formulation

## ► Problem formulation

$$\arg \min_{w_i, w_k} \left\| Im - ICNN \left( F^{-1} (KCNN(\downarrow k)) \right) \right\|^2 +$$

$$\lambda \left\| \downarrow k - \downarrow F(ICNN(F^{-1}(KCNN(\downarrow k)))) \right\|^2$$

# KIKI Architecture

## ► KCNN

Deep CNN for k-space completion

**A** Architecture of KCNN

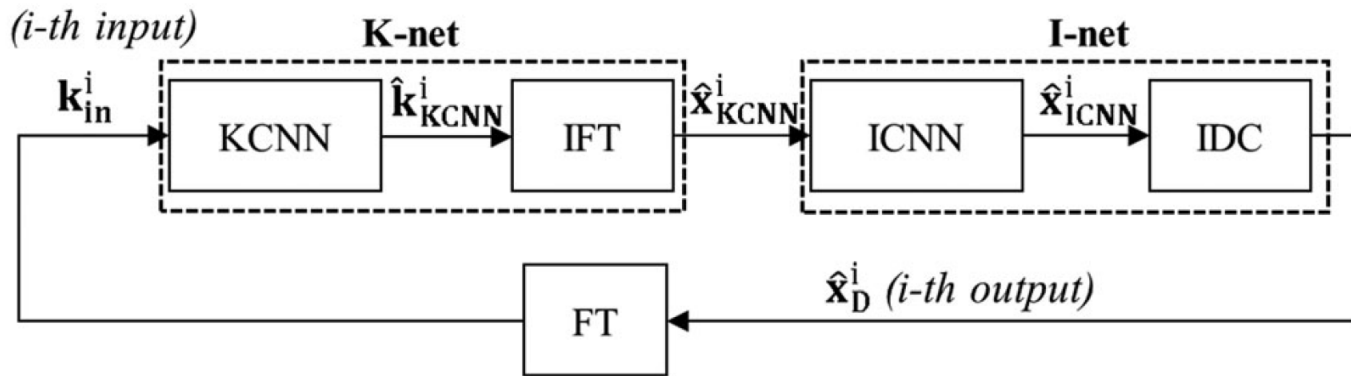

# KIKI Architecture

## ► ICNN

Deep CNN for image restoration

# KIKI Architecture

**FIGURE 2** Block diagram for data flow and intermediate operations of cross-domain CNNs (CD-CNNs)

# Dataset - fastMRI

- ▶ Facebook, NYU, UFlorida
- ▶ An Open Dataset and Benchmarks for Accelerated MRI
- ▶ A large-scale collection of both raw MR measurements and clinical MR images, that can be used for training and evaluation of machine-learning approaches to MR image reconstruction

facebook AI Research

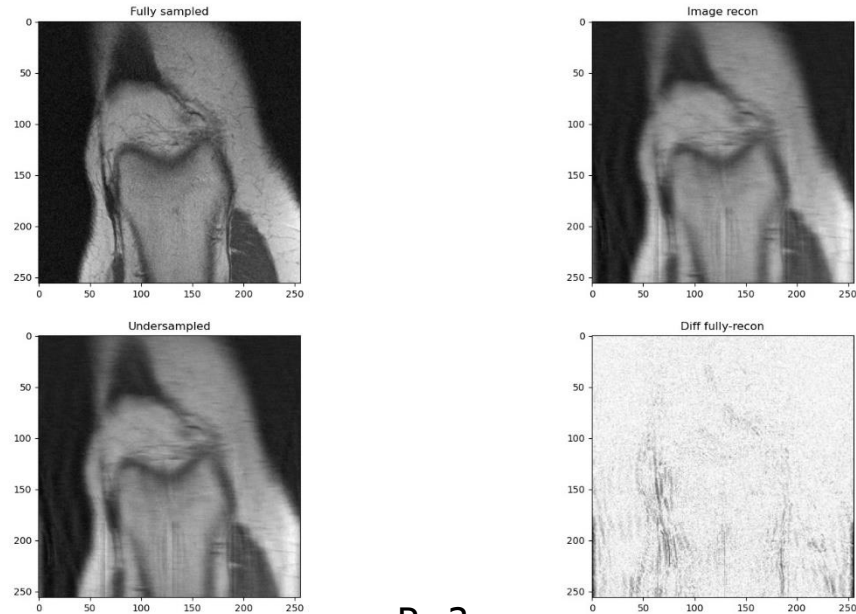

# fastMRI

- ▶ Goal
  - make rapid advances in the state of the art for MR image reconstruction
- ▶ Single – Coil track: knee only
  - Center cropped to 256X256
  - Raw knee space
- ▶ Image normalize to range 0-1

# Undersampling mask

# Results

$R=3$

$MSE = 0.002602$   $NMSE = 0.007142$

$PSNR = 28.28$   $SSIM = 0.6785$

# Results

## Experiment 2 - adding skip connection to K-net

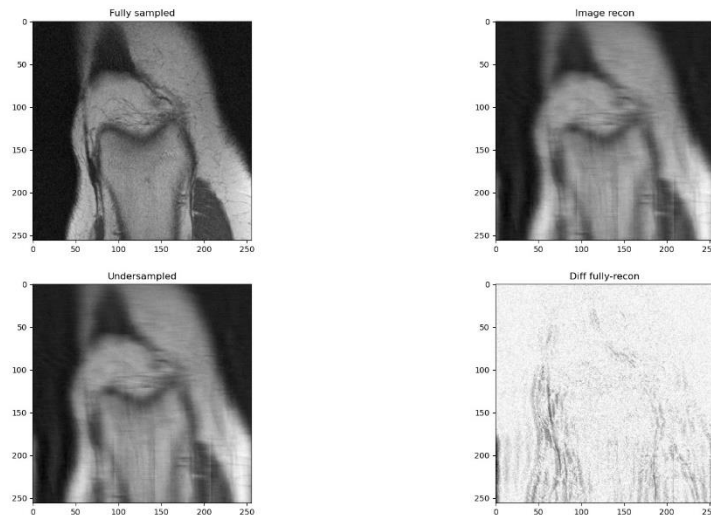

$R=4$

$MSE = 0.003901$   $NMSE = 0.01071$

$PSNR = 26.53$   $SSIM = 0.6079$

# Experiment 3 – 35 layers

$R=4$

$MSE = 0.003256$   $NMSE = 0.008937$

$PSNR = 27.31$   $SSIM = 0.6125$

# Experiment 4 – Huber loss

$R=2$

MSE = 0.001747 NMSE = 0.004796

PSNR = 30.01 SSIM = 0.7858

# Summary and conclusion

# Conclusion

- ▶ Noisy data
- ▶ Pre processing of the data
- ▶ Data consist term

**Thanks for  
listening!**
